

RESUME SUMMARY

Resourceful and detail-oriented B.Tech student in Electronics and Computer Science with practical exposure to IoT and Embedded Systems. Successfully completed a hands-on internship at IFB Industries Ltd., where I developed real-time automation and monitoring solutions using Node.js, WebSockets, and RESTful APIs. Passionate about building scalable, intelligent, and user-focused tech products. Eager to contribute to forward-thinking teams through strong problem-solving skills, system integration expertise, and a commitment to continuous innovation.

EDUCATIONAL QUALIFICATIONS

Qualification	School/College	Board/University	Year	% / CGPA
B.Tech in Electronics & Computer Science	KIIT Bhubaneswar, School of Electronics	Kalinga Institute of Industrial Technology (KIIT)	Ongoing (Sem 4)	8.57 CGPA
Class XII (PCMB)	Delhi Public School, Ruby Park, Kolkata	CBSE	2023	88.4%
Class X	Delhi Public School, Joka, South Kolkata	CBSE	2021	91.4%

WORK EXPERIENCE

Product Intern – IFB Industries Ltd – May 2025 to July 2025

- Developed a **Kiosk-Based Smart System** using HTML, CSS, JavaScript, and Node-RED to enable real-time appliance control and alerting, enhancing customer experience at demo kiosks.
- Designed and implemented an **Occupancy-Based Automation System** using sensors and Node.js to reduce unnecessary power consumption, improving energy efficiency in office spaces.
- Built a **Smart Monitoring System** using WebSocket, MQTT, and ngrok to stream live environmental data remotely, ensuring real-time decision-making capability for facility managers.

INTERNSHIP

IoT and Embedded Systems Intern – IFB Industries Ltd – May 2025 to July 2025

- Collaborated with cross-functional teams to create interactive touchscreen-based appliance demo units for trade fairs and in-store displays.
- Integrated REST APIs, real-time dashboards, and sensor interfacing to enable seamless smart system deployments.
- Applied practical knowledge of networking and embedded platforms for data acquisition and remote visualization.

LIVE PROJECTS / ACADEMIC PROJECTS

Kiosk-Based Smart System – IFB Industries Ltd – May 2025 to July 2025

- Developed a touchscreen-based kiosk using HTML, CSS, JavaScript, and Node-RED to control and demonstrate smart appliances.
- Integrated real-time notifications and appliance behavior simulation, enhancing interactive demos for showroom use.

Occupancy-Based Automation System – IFB Industries Ltd – May 2025 to July 2025

- Designed a smart workspace automation solution using motion and IR sensors to detect presence and adjust electrical systems accordingly.

Smart Monitoring System – IFB Industries Ltd – May 2025 to July 2025

- Built an environmental dashboard using MQTT and WebSockets to visualize temperature, humidity, and gas sensor data in real time.
- Enabled remote access using ngrok tunneling for secure viewing and monitoring on cloud-connected devices.

Remote Controlled AeroModel – IIT Kharagpur – Jan 2025 to Mar 2025

- Participated in National Aeromodelling Competition; built a radio-controlled aircraft with stability algorithms and remote navigation controls.

LPG Gas Detection Mechanism – Feb 2024 to Mar 2024

- Constructed a microcontroller-based MQ5 gas leak detection system with buzzer alert mechanism and safety response triggers.

Password Protected Security System – Oct 2023 to Dec 2023

- Implemented a microcontroller system using keypad-based input and password verification for basic digital locking.

Home Automation System – Aug 2023 to Oct 2023

- Designed an Arduino-based home automation circuit responding to sensor input and basic voice commands.

Non-Invasive Glucose Monitoring (Ideation Stage) – April 2025

- Proposed an optical-based glucose measurement system, submitted as part of a healthcare tech challenge at KIIT.

TRAININGS & CERTIFICATIONS

- | | |
|--|----------------------------|
| • IFB Industries – IoT & Embedded Systems Internship Certification | Completed: 28 July 2025 |
| • Scaler Academy – Database Management Systems (DBMS) | Completed: April 2025 |
| • Startup Bharat – KIIT University | 1st Position – March 2025 |
| • Business Plan Competition – IIT Kharagpur | 13th Position – March 2025 |

SKILLS

- Python, C/C++, Java, HTML, CSS, JavaScript, Node.js, Node-RED, MQTT, WebSocket, REST API, ngrok, Vivado, TINA, Arduino IDE
- Product Management, Design Thinking, Embedded Systems, Sensor Interfacing, Real-Time Dashboards

INTERESTS & ACTIVITIES

- Web Development and Front End Development
- Backend Development
- Participating in Tech Fests and Hackathons
- Embedded and Iot Projects
- Aeromodelling and UAV Systems
